

Electives in the Philosophy and Economics MA-Programme

To get credits for a course/module in the Electives section of the P&E MA program, you can pick one of the courses/modules listed under the link below. If the course/module is listed, please double check on cmlife, whether a link to our electives already exists (click on the course and choose content). If this is the case, there is nothing else you need to do.

If your selected course/module is not listed, please follow the subsequent steps:

- 1) Check whether the course/module you would like to select is a Master's course that gives 6 ECTS.
(Note that BA courses/modules that are also open for MA students do not count. It must be a true MA course listed in some Examination documents of existing MA programs. You can check whether a course is offered at the BA or MA level in cmlife!)
- 2) If 1) is fulfilled, please talk to the lecturer, whether he/she is willing to accept P&E students. (This needs not be the case if certain prerequisites are required.)
- 3) If 1) and 2) are fulfilled, please contact Claudia Ficht (claudia.ficht@uni-bayreuth.de) with a link to a webpage providing relevant information for the course and forward the email confirming acceptance of P&E-students as participants of the course.

Please note that we can only handle cases for which the respect requests have been sent to Claudia Ficht by the end of the first week of the lecture period. We will only make decisions on cases for which all relevant information is available. There will be no exceptions and these rules are not open for discussion.

For the course list, please see:
